This publication provides national statistics of the 28 Member States, which enable to compare Italy and Lombardia to other Member States, as well as regional statistics, covering those regions that are similar to Lombardia.

The 22 regions that are compared to Lombardia belong to the NUTS1 and NUTS2 categories and have been selected according to a set of parameters (described here below)

The NUTS nomenclature (Nomenclature of territorial units for statistics) is drawn up by Eurostat according to a hierarchical classification of the institutional levels present in the various European countries.

NUTS0 is country level (it for Italy, de for Germany, fr for France...). The NUTS1 category includes the German and Belgian Federal States and aggregates of regions of the most populated states (de1 for Bayern, be2 for Vlaams Gewest, itc for the North-West of Italy, ukq for the West Midlands in the United Kingdom...). The NUTS2 category corresponds to the Italian regions, the French departments, the Spanish autonomous communities (itc4 for Lombardia, fr71 for Rhône-Alps, es51 for Cataluña...).

The NUTS structure is the following:

- | | |
|--------|------------|
| • it | Italia |
| • itc | Nord Ovest |
| • itc4 | Lombardia |

The parameters used to select the regions to be compared with Lombardia refer to:

according to the following parameters:

- Surface area
- Population
- Population density
- Gross Domestic Product
- Per capita Gross Domestic Product

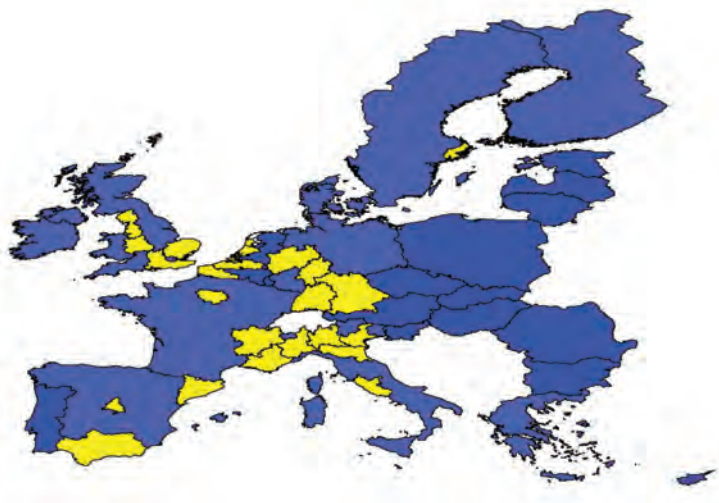

The values of the regions selected varied between + / - 50% compared to the values recorded in Lombardia; the data presented refer to those regions that had the largest number of parameters complying with this criterion.

Although not fully meeting the parameters required, some other regions were included in the comparisons, in order to provide a more balanced description of the various Member States.

Hence the statistics presented cover 23 regional areas (13 NUTS1 and 10 NUTS2), including Lombardia, out of a total of 82 areas under NUTS1 level and 254 areas under NUTS2 level.

POPULATION DENSITY. YEAR 2016

Inhabitants / km²

Source: calculation based on data from Eurostat

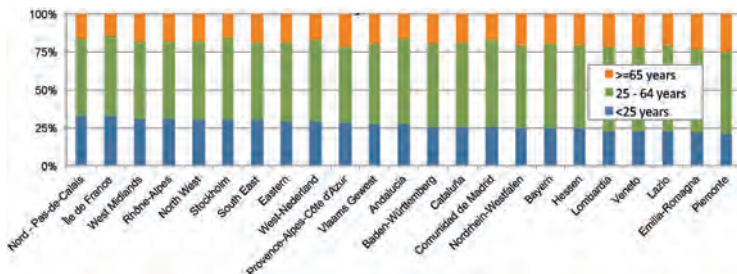

The European regions observed have different population densities, ranging from 97 inhabitants per km² in Andalucía to over 1000 in Île de France. Very high densities are also recorded in West-Nederland and in the area of Madrid, corresponding, respectively, to 930 and 804 inhabitants per km². With 419 inhabitants per km², Lombardia ranks in the 15th position in the scale of the 23 regions observed.

BIRTH RATES. YEAR 2015

Source: calculation based on data from Eurostat

In 2015 birth rates in the EU Member States ranged from 8.0 (live births per 1,000 inhabitants) in Italy to 15.1 in Ireland.

Across the regions observed, the Italian ones are, in fact, those that recorded the lowest rates.

The highest rates were instead recorded in the areas of Stockholm (13.3) and Île de France (14.8).
